

FINALLY, A COMPLETE MOBILE INSPECTION APP DESIGNED BY SAFETY EXPERTS

WESTMINSTER, CO - [Safety Hive™](#), an emerging leader in safety management software, announces the release of [Safety Inspect Pro™](#). The mobile **app** fulfills what has been missing in the safety industry; an app that can inspect buildings, locations, equipment, ppe, tools and people, all tied together in a simple database. The concept of the app was developed by the safety services experts at Martin Technical to help make safety management more efficient and empower employees with better tools and information for inspections.

Users can use one of the OSHA inspection checklists from the provided library, or create their own new forms which can be deployed in minutes. Talk to text, barcode scanning and instructions on performing the inspection and drop-down selections for failure reasons put this app in a different class that reduces time for users up to 80% while also improving accuracy and detailed information at the same time.

Monitoring of inspections by safety managers allows for full visibility and real-time monitoring of people, equipment and other assets, raising communication and safety awareness helping to quickly identify inspection failures and prevent injuries.
